

### Artist Statement- Barbara Varga

My name is Barbara Varga a Hungarian young lady who forged a solid and diverse path between her inimitable spicy Hungarian culture and it`s also unrepeatably culturally rich Netherlands. I am living in The Netherlands, and I am continually developing on my artistic career.

The first reason for me of creating art is an emotional release of my mind, every time I receive an impulse of inspiration I can't wait to put it on canvas.

The second purpose of making art is the way I express my point of view about basic but important evaluation of human feelings and beings.

Hereby I am talking about love, relations, emotional roller coasters, power of nature, mindfulness and not to forget about the evaluation of nature.

Basically I am using canvases in different shapes and sizes.

For painting material I prefer acrylic paint. Regarding tools, I am using different size and form of spatulas, brushes and my own hand.

In the last years I am more focused on abstract and pouring art, with these techniques I have found my own style.

Going forward regarding future plans, my purpose is to be seen, become known as a trusted artist. Of course selling my own creations or paintings by requests/ orders is my final goal.

I never studied art or painting, but I believe that you will find development and probably something new and eye-catching elements in my works and the portfolio which is built up by myself.
